This yeere there will appeare and be ſeene thꝛee Eclipſes, that is, one of the Sunne, and two of the Moone.

The firſt Eclypſe of the Moone, is on the xi. day of Febꝛuary, about halfe an houre after v. a clock in the moꝛning.

The Eclypſe of the Sunne, is on the xxv. day of Febꝛuary, ſomwhat before xi. a clocke before noone.

Another Eclipſe of the Moone, is on the vi. day of Auguſt, halfe an houre after vii. a clock in the euening.

Neceſſarie elections, concerning Phyſicke and Chyrurgerie.

IF any of the foure naturall powers, ſerving for nutrition be weakened, and ſo not able to do theyr proper office and dutie, for the amending and ſtrengthening thereof, the courſe and motion of the Moone vnder the xii. celeſtiall ſignes of the Zodiake, would be duly conſidered.

The Moone being well elected, in

Fierie ſignes.	Aries and Sagittari.	The vertue Attractiue is beſt comforted, for it worketh with heate and drineſſe.
Earthy ſignes.	Taurus & Virgo.	The vertue Retentiue is moſt ſtrengthened, for it worketh with colde and drineſſe.
Ayrie ſignes.	Gemini first halfe of Libra & Aquarius.	The vertue Digeſtiue is beſt comforted, for it worketh with temperate heat and moyſtneſſe.
Watery ſignes.	Caneer laſt halfe of Scorpio and Piſces.	The vertue Expulſiue is beſt repayred, for it worketh with cold and moyſtneſſe.

Note, that from the change of the Moone, to the firſt quarter, and from the full to the ſecond quarter, the humors doe moove from the internall parts, to the outward members: as contrarywiſe, from the firſt quarter to the full, and from the ſecond quarter to the change, they are caryed by a diuers motion, from the

the outward members to the inward parts of the body. Therefore in the firſt and third weekes of the Moone, it is beſt vſing externall euacuations, as Phlebothomie, Bathes, Cupping, &c. But in the ſecond and fourth weekes of the Moone, internall euacuations, or purging medicines, are miniſtred with beſt ſucceſſe.

When the wether is very hotte, or very colde, it is extreamlye dangerous eyther to purge or let blood, vnleſſe preſent and vrgent neceſſitie require the ſame, as the onely moſt preſent and ſpeedie remedie.

Prepare any humor, when the Moone is in an ayrie ſigne, as namely in Gemini, the firſt halfe of Libra, or in Aquary.

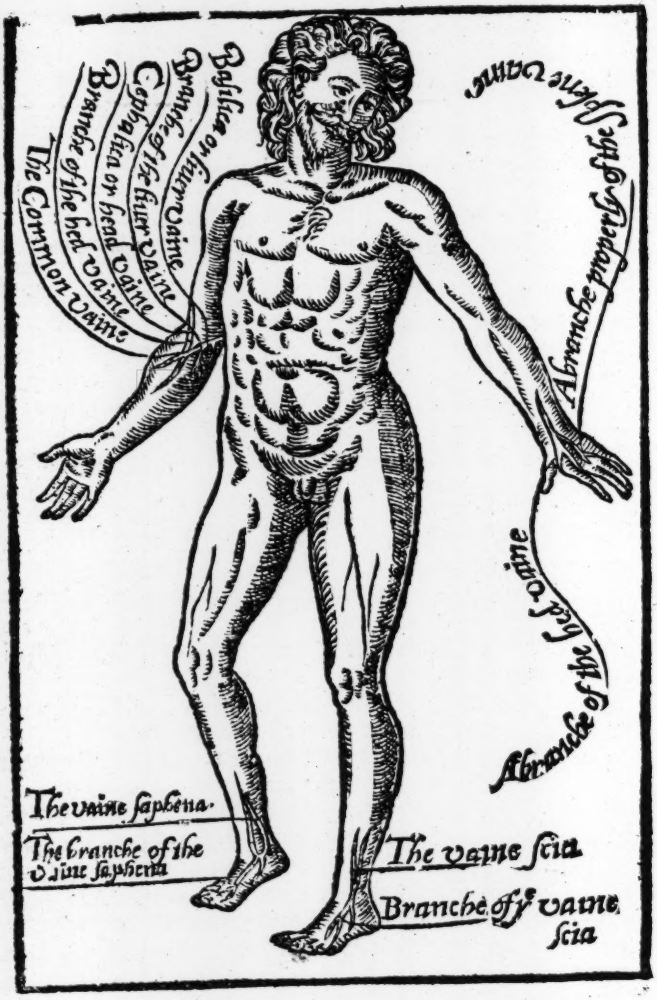

A Purgation is beſt taken, the Moone being in a watrie ſigne.

With { Electuaries. Potions. Pylles. } in { Cancer. Scorpius. Piſces

Phlebothomie is generally to be commended, when the Moone is well affected in Cancer, Aquarius, or Piſces: but in any wiſe by counſell and conſent of ſome good and expert Phiſition.

Bathe for health, the Moone being in Aries, Leo, or Sagitarius: and for cleanlineſſe, ſhe being in Libra or Piſces.

An oyntment or plaſter, is beſt applyed, when the Moone is in that ſigne which gouerneth the ſame member to which it is appliable. But for the amendment of any defect or want, curable and ſupplicable by the vſe and application of the hand, it is farre otherwiſe: for in ſuch a caſe muſt euer be remembred, that it is very dangerous, and extreame perillous, to open a veyne, or to make any notable inciſion, or canterization in any member, when the Moone is reſident in that ſigne which ruleth the ſame member.

A Prognoſtication

for this yeere of our *Lorde and Sauiour* Ieſus Chriſt.

1598.

Publiſhed by *Gabriel Frend*, ſtudent in Aſtrologie and Phiſicke.

Imprinted at London *by Richard Watkins and* Iames Roberts.

Cum priuilegio Regiæ Maieſtatis.

Of the foure quarters of this yeere of our Lord God. 1598.

Of VVinter.

WInter, by our Astronomicall computation, beginneth at the entrance of the Sunne into the first minute of Capricorne, which is this yeere 1598. on the 12. daye of December foregoing, and continueth vnto the tenth of Marche folowing. Now hath the Sunne his greatest South declination from the Equinoctiall lyne, rising Southeast, and setting Southwest: And now is the Hyemall or Winter Solstice making with vs the shortest day and longest night in all the yeere.

This season by proper inclination is colde and moyste, not folowing the disposition of the signe Capricorne, which is of qualitie colde and drye, in complexion compared vnto melancholy, bitter of taste, nocturnall, feminine, meridional, and of the earthy Trigon. And now doth the Sunne begin to mount and rise higher within our Meridian, when he is once entred into that celestiall signe.

Diseases vsually afflicting mens bodyes this quarter, are, Hoarsenes, colde Lasks, Rhewmes, Coughes, Swelling in the face by occasion of the Toothache, the Stone, the Goute, Dropsie, Melancholy passions, Agues of sundry sorts, with some other troublesome diseases, not at the beginning perfectly vnderstood, though too sensibly felt, if it pleased the Almighty to ỹ contrary.

Of the Spring.

THe Winter revolution being fully finished, the Sunne mounteth, and mooueth into the first degree of the first equinoctiall signe Aries, at which very instant moment the Spring time hath his beginning, which will be this yeere on the 21. day of Marche. Now is the Vernall Equinoctiall, the Sunne rysing at vi. a clocke in the morning, and setting at vi. a clock in the euening, making the Artificiall day equall with the night.

This quarter is naturally hot and moyst, resembling the san-

guine complexion, and not vnlike to the element of Ayre. And although Aries be a signe hot and dry, cholerick of complexion, bitter of taste, mooueable, of the day, Masculine, easterly, and of the fiery Trigon, yet such effect the Sunne worketh therein, that this is the most delicate and temperate time of the yeere, nothing subiect to such inconueniences as other times doe bring. And where as this season, being naturally hote and moyste, and that with temperance, must needs be most healthfull of all the rest, yet sheweth it forth many sicknesses, as Aches, Sciatikes, Cramps, Plurisies, Measels, small Pore, inflamation of the Lyuer, and diuers other vsually raging in this time of the yeere.

Of Summer.

The thyrd quarter of the yeere, called Summer, hath beginning on the 12. day of June, at the entring of the Sunne into the first minute of Cancer, which is the Sommer Solstice: And now is the day at the longest, and the Sunne highest ouer our heads, and at no other time of the yeere commeth so nigh vnto the North, rysing in the morning farre Northeast, and going downe as farre Northwest. This season is commonly hote and dry, exhausting mens bodyes with immoderate heate, with sweating and detection of appetite, howbeit very necessarie for the ripening of such fruites as God hath prouided both for men and beasts. And although Cancer be a signe colde and moyste, without taste, compared to fleame, feminine, nocturnall, northerlie, and of the Watry Trigon, yet little abateth it the effects before specified, but doth rather expresse, that then the Sunne beginneth to returne backward to the South, and by litle and litle to forsake her Northerly habitation.

Sundry diseases doth vsually raigne in this Summer quarter: as Tertian and quartane Agues, Fluxes, Plurisies, small Pox, Purples, Measels, and diuers other painfull sicknesses, which Almightie God, for his great mercies sake releeue vs in, with comfort in Christ Jesus our Lord and Sauiour.

Of

Of Harueſt.

HArueſt, being the fourth and laſt quarter of this yeere, after our vſuall computation, beginneth the 13. day of September, the Sunne then entring into the ſigne Libra, working the like effect that he did at his going into Aries, that is, making the day and night againe of one equall length, for then the ſunne ryſeth and ſetteth at vi. in the morning and euening. And Libra is a ſigne warme and moyſte, ſanguine, ſweete of taſte, diurnall, Maſculine, weſterly, mooueable, and of the ayre Trigon, not cauſing the ſeaſon to be ſuch, but rather expreſſing this qualitie, that the Sunne poſſeſſing this ſigne, the dayes and nights are peyſed (as it were) in equall ballance: But in trueth this ſeaſon naturally is colde and dry, inconſtantly diſtempered, ſometime hot, ſometime colde, otherwhyles warme dayes anſwered with colde nights, altogether dangerous for the health of man, without very wary circumſpection.

This time of the yeere, refuſeth no diſeaſes, as quartane Agues, black Jaundies, obſtructions, Pyles, Sciatica, the Goute, and many moe, tedious to be repeated: Therefore let vs humbly beſeech the Almightie, by our vnfaigned and zealous prayers, to abridge his puniſhments, and to extend his bleſſings towards vs.

O then repent, leaue off henceforth to ſinne,
And call and cryе to God for his good grace:
Refuſe ſuch wayes as thou haſt walked in,
Correct thy faults, whylſt thou haſt time and ſpace,
Leaſt all too late, thou ſeekſt, and cannot finde:
True ioy or comfort to thy troubled minde.

FINIS.

Memorandum.

THe Moone being placed in any of theſe 28. houſes or Manſions, it is probable to be ſuch weather, as here is ſet downe, except the influence of the Moone be hindered and her vertue repreſſed, by the continuence of ſtronger aſpects, and more predominating Planets.
